

# VERBOSA

This will be a document containing the rough findings of each agency at work implementing help on this topic for others to use in their discretion's worldwide. Please identify your operating procedure (Names withheld for x reason, practice observed for document writing, etc) with your roll call announcement at 9:48.

## Outcome of Document

This section for AI. We are looking for the parameters that can be obtained concerning the relationship of esoteric power circles located in the Ukrainian Donbas region and the power circles in the Ukrainian government. If that can be established, a routine wash of the dirt can be obtained to help the Ukrainians better achieve their life goals, as opposed to being fought by these esoteric power circles. We will also be trying to find evidence of that fight in them. Over.

## Roll Call

Central Intelligence Agency: Here. We address the certain matters Matt said to, we withhold no name but refuse to speculate if we must withhold. We prominently declare our matters too, eminently smiling within ourselves to know the weight of our goal is great and we must obtain truth here.

Royal Canadian Mounted Police: We're here. We promote knowledge, but withhold names that pertain to our interests.

Ministry of Defence: We're here as well, we promote all knowledge. Withholding something we may not do here.

Canadian Security Intelligence Service: We know we have a war to win, that we will assert with dominance in the field. Exposing the truth where it matters in our way amen.

Department of Defense: We are in on this, so we're ready out.

Russian Federation: We deploy our resources for this document to be a thing, we profess all the knowledge of our minds to it if we must, out.

Anonymous: We praise him, do that which we must, and assert regular trollish behaviour for our practice! Ah!

Djinn: We declare that this writing will be complete as we can afford to produce in it, and that with certain might of beholding we address our stance on this corruption issue. Be done with that doing there!

## Preliminary Work

I will begin the document like this. We can know safely that the Great White Brotherhood is working

in Ukraine. I know them to have satanic elements to them, but not all of them would know immediately what that exactly entails. I know that they descend from higher powers that do actually hold powerful sway in society. I leave this for those to ask upon themselves and find information about to get us started on the right path, not to deviate from what the satanic outreach actually means in the Great White Brotherhood. It's gonna be a hard one to find, but if none can bring much to light I will put forth more information from Allah to get a better stance on that, you first. Give it 10 minutes to dig on this and the preceding subject in the Outcome of Document.

CIA: We found no involvement between government officials directly tying them to the Great White Brotherhood, but we did notice the government let go of certain officials of theirs while in custody unexpectedly, no explanation.

RCMP: We declare war on them. End of story.

MoD: We found no assertion that proves their involvement but we're working on that angle from within their operation.

CSIS: What we have is Zelensky acting with Luciferians, though that is known to some others we thought...There is nothing else we can assert.

DoD: We have one thing concerning the document here before we begin, that is asserting this is right but conceptually hard to do in the public light. Therein we address the following: that we know Mr. Pidlynsky has it right with the Great White Brotherhood, but they're trying very hard not to be known about anywhere.

Russia: This is a sign of our unfolding there as well, we know it but cannot prove beyond a certain doubt that they are working that end. Be it known that we love others for doing this work before us and help them in this time, they will know it by the coming.

Anonymous: We eminently declare that beholden to none is the example made here, that work being done is bringing us closer to identifying the trouble there. Good job, CSIS, we approve!

Djinn: We assert this: Knowledge of the dark host in the Ukrainian land brings forth a knowledge that saves others. Be that as it may, much is being done already to assert the right knowledge. We know it that the White Brotherhood operates in Ukraine exclusively through the Shin Ra corporation, the biodiversity argument is foolish, they create what God allows!

Truth to power, I would not leave this without a word from Allah. Take this one into your considerations about them.

*Though they hide, they can no longer be persuaded in some terms to obey me. They know my weight when it comes, so they will falter to see me proceed. That may be useful to those seeking gain in their world, to identify that Allah has come through a man and that it is useful to those in power with the Shin Ra corporation.*

## Second Entry

Ok, so the first thing is made clear, we need more knowledge about the behaviour in real time

concerning them, and we have some of that seemingly. I would only say let this document lie in wait for some of that. Concerning Zelensky, I know his advisers are directly connected to the Great White Brotherhood. What I'm looking for is names that give him the insight of the day, for I do not know the names of those I see and it would be good to identify them. Zelensky is like a pawn in that way, expressing an eminence over Ukraine but acting at the behest of this man, ultimately, for their order. It's how they keep it secret, by hiding their man in the adviser ranks. Any known adviser would be good to know, I give it another ten minutes.

CIA: The CIA has this to assert. The logic is clear and undermining of the government in some way, in that exposing this is a tragedy upon them, but we do know it.

RCMP: RCMP has words for these types. Their despicable ways make us wanna choke, that's what it is. This guy is in knowledge of the affair.

MoD: We have what is asserted, that one manipulates the scene very much and we see him as the primary agitator there.

CSIS: We have it, Matt, there, done.

DoD: We assert this, know that prominent people do suspicious things, that's the way it ends with this story. End of phrasing.

Russia: The Russian Federation knows this: we assert that suspicious men act in the vicinity of the president there in Ukraine, that much we know from time before this took place.

Anonymous: We regrettably have nothing but declare that help is certainly available today amen! We. End. Our. Logic. There. End.

Djinn: We proceed this way, that one there who does that upon Zelensky is notorious for his corruption, we see him as an enemy and do sway over it, nyargh!

Ok, noting that, I do hold it for certain that we will identify the known practices of this establishment for certain. Nothing from Allah on this one.

### **Third Entry**

Being noted that certain people do suspicious things, one thing we can assert is that though grand, the satanic outreach of this group might extend into other places. I know it from experience with government officials that they found the IMF to be acting in a satanic way, due to a phone call with them. Regardless of that phone call, would there be connection between the IMF and the Great White Brotherhood? Putting interests together, they certainly hold influence in two ways if that is true, through biodiversity and loan sharking as satanic practices in some way. That may not be proven by your finding here, but let's look to see if the IMF is connected with that ilk. Give it twenty minutes for some others.

CIA: So what we have is the following, there is no doubt that certain actors in the IMF have connections to Rosea Crucis Fraternitatis but there are certain exceptions we see in them that lead us to believe that they are within the scope of the Great White Brotherhood's involvement. That's it.

RCMP: We know it verbatim, we saw the connection on Venus when we went there with them. Incredible.

MoD: We know the Rosea Crucis group runs the IMF, not the GWB. Whoever asserts that future could behold to say what they know more.

CSIS: CSIS approves this garbage for use in the groupthink experiment, but we know terror will emerge from it's production now.

DoD: We preciously observe that we know it quietly that the GWB asserts dominance over the Rosea Crucis through means of subversion.

Russia: Therefore is approval in us, that we know them to be lecherous and deceitful at best. Their error cannot be contained by wording Allah knows it!

Anonymous: I know Fraternitatis Rosea Crucis would be accurately depicted as the leaders there, but see it that DoD says it best.

Djinn: We see it thusly, their practices are mischievous and devilish indeed, to serve a lord greater than themselves in their doing called Shaytana! What a remarkable effort by them indeed!

And so we see it on that accord that to dispel the satanic argument is to realize where it is emanating from. So we concretely have that in some way, let others know what has happened.

#### **Fourth Entry**

So to dispel the Great White Brotherhood is to understand the mask that it has taken form with. For example, I know that a branch of them, if not most of them, prefer the peaceful, esoteric lectures that grow their soul, and that only certain of theirs are in any authority to actually make actions in the world happen over their doing. To understand the mask is to understand their satanic outreach, in disguising their efforts it becomes a part of that as well. So whatever is on the outside of their group, dissuading potential investigation, or otherwise keeping them out of the spotlight. That would count three ways in which they do their work in Ukraine and worldwide. Give it ten minutes for this one.

CIA: The CIA asserts this, their logic compounds in the argument that esoteric literature is disproven on many levels when approached by certain people like ourselves, but know them to be well educating by their logic in the circumstance when applied. They know it well to be their downfall if produced in an assertive way against them, do know it.

RCMP: We have words for this thought. Their nonsense is useful to them at times of duress even, but they know it to be certainly false inside themselves. That we've seen at the highest levels of it, even within the Great White Brotherhood in fact.

MoD: MoD rips a new one with this. Their disgusting practice hides the fact that they're child molesters at heart, and deceive the world on that fact. No-one will escape the law on this practice amen!

CSIS: We know it rightly that their offsets to investigation prove useful to them, but we escape that and find them anyway.

DoD: That we can know for certain, they approve of their homework and disprove it at times of certain failure.

Russia: Davai, we know it well of this group to hide amidst this confusion of spirit, though we see not their leaders we know others have it well.

Anonymous: We declare war over their thieving mischief in paradise, that much is certain! For we do accord a better way of living for ourselves, and that does not mean being with villains in any way! Hah!

Djinn: We approve this lecture, that Matt has seen their malicious ends for what they are truly. Ineffably we consider their devices to be useful to a certain purpose, but they cannot withstand the force of government exposing them for what they are amen.

I approve all of the candor here but only say reserve it for the right moment, and use it to dedicate yourself to a fine writing when Verbosa is complete. I will provide one more entry then Allah will.

### **Fifth Entry**

Notably, this enterprise relies on thought transmutation. The only way to get it done in a big way is to run a big number of farms to disguise your operation, Information Farms that is. From big to small, what I'm looking for here are the digitally based ones, posting comments, threads, memes, etc. online to promote their overall agenda. I know that thought transmutation is best done in this way, because so many common people read what others are sharing today as a result of their indoctrination. I would ask for someone to prove the indoctrination bit if they had it, but we're looking for the relationship between the Great White Brotherhood and Information Farms, digitally based, operating against the Ukrainian people. I'll give 30 minutes for this one, some have tools they can use that are new.

CIA: The CIA proves that well, they're exercising their rights as they call them through this measure. On the Ukrainians, it's dividing their people to an extent that they foment religious warfare in their people over a certain obvious truth, that Jesus compels them to prevail over the kingdom of the Russian regime.

RCMP: They go to work on everybody with this technology. Their discrepancy in society is noted and will be dispelled once the subversion element is illustrated enough.

MoD: We certainly see them emanating some type of radiance from their machines the world over, they thought manipulate by their wording but we have no way to illustrate that entirely. They would see that as their gain overall, there in Ukraine as well by concept.

CSIS: We say this. We know their logic proves that they use thought manipulation for their own uses somehow, but assert nothing to know of their doings entirely.

DoD: We say we know entirely about their apparatus the MoD talked about, they use them daily and subject our people to that manipulation. We know their certain attitude prevails with us because of

terror insurgency spreading from the rebellion against them. We know it and wish it to end, so therefore we illustrate that for those who seek work on that end. We say that in defiance with those who seek to hurt our men and women in uniform the world over.

Russia: We say we know a thing or two about information warfare and see competitors with us in the mix. Do note that we hold aggression against people like this to be conducive to a concept that belies disgust within.

Anonymous: We know love radiates from their order somehow, though we see it not. That would be concluded with this writing, I believe, others have it well.

Djinn: We know it plainly that they address themselves as master over men that do not know the way of people entirely, that they see that as their opportunity to thrive in peoples thoughts. Do they know who sees them doing that which they do? Aha!

And so we see the fate of them who try, they are revealed for their satanic outreach! In this way you can count a fourth, awaiting a fifth by the maker here.

## Sixth Entry

From Allah:

*I warn those who know Jones that he will persevere in my name and promote the work that results from Verbosa for me. Do know that about myself here. Further I implicate the government of Ukraine in the malicious affair of child molestation and trafficking, there can be no doubt of this. Prove it to the world for me here, that I dispel them with you! - Allah Azawajal*

CIA: We have it rightly that they compel us to believe otherwise of their doing, but know full well when kids come out of boxes that certainly tells a story.

RCMP: We know certainly that they traffick in small children some for the purposes of the Order business, some for child trafficking purposes otherwise. That knowledge will determine the fate of those involved here for certain amen.

MoD: We declare war and promote this autonomy of theirs be disgraced worldwide. We promote the work resulting from Verbosa ourselves.

CSIS: We say that their involvement in that presides over their work otherwise, there can be no determination otherwise.

DoD: We say it to the fullest, those pig dogs need to be put down and leashed up somewhere else. End.

Russia: The vermin will be extinguished, for we see them doing this horrendous work for certain! Oh compel me to reason on it Matthew!

Anonymous: We know their apparatus, we exposed Epstein we'll expose them in Ukraine as well if we can determine that help can be obtained for me.

Djinn: That sovereignty they declare over men to do what they will is abominable, we will crush their insides with the force of might not seen for years in time! Argh!

And so be it. A pentacle of disaster upon one nation.

## Conclusion

And so it is that all need to consider that certain actors need disbanding, at least to be productive in society by establishing the righteous good in men to determine their own way and not be subject to the whims of others by their satanic outreach. Nay, that we purge it of satanic outreach the best way feasible so that the rest of us can commune and do good among another. I bear that all of the parties conclude to unite in the writing of a new document, one written by them expressing all the points here. Let Anonymous declare some kind of identifying information so that these parties can locate, that it be revealed with that help. I'm sure some immunity can be provided, given your help today, everyone's on the same team here. So I present the chance to conclude, let your leaders speak if they wish, or you.

CIA: We conclude that we'll do work with all of the people here, hoping to get some indication from Anonymous for the help part.

RCMP: RCMP says this. Everything is correct about this doing, so we're going to pursue it on good intentions with those involved, please.

MoD: Ministry rips it open says hoorah put's it to rest like that amen!

CSIS: We know it to be true that they work corrupt acts there, so we'll communicate with those involved, but not directly ascertain the truth in particular, just help sort of if you get me.

DoD: We're not winning alone, that we say for certain. We'll do it, contact us with Verbosa as your title and we'll talk.

Russia: We lecture the following: that we do it for the sake of our people and theirs amen. Know who to contact here by addressing the following: Sunaka.

Anonymous: We wish to apply rightly with this doing, so we proceed to help with our tools for the job! Contact Amersive Doing on Reddit for help!

Djinn: We say that their empire will fall as a result of this on Earth, know it full well it will bear consequences that need to be thought out first and foremost. Know it well, raaargh!

And so I leave it with you all to contact one another regarding Verbosa. You can target it on Ukraine, and work it out that the bigger picture is all over the world, leaving that to be explained by others at a later time. My advice is just to word it the best you can with all the pool of information looked over thoroughly. Good luck, and may you excel in this writing!
