

Resembla Semanora

*A document relating the nature of the temporal rift with the certain obvious
nature it is imposing with in terms of destructiveness*

Table of Contents:

1. Introduction
2. Scientific Data
3. Control Mechanisms
4. Threats Emergent
5. Conclusion

1. Introduction

Somewhere in our Milky Way galaxy, a new paradigm has begun to unfold. Due to interference by one of the participants, a tear has been created that will rip us all to pieces if the puzzle is not solved rightly. One clear thing to note before the rest of the document takes place is the willingness of the participant to reveal themselves, though I hide that myself here. Do know responsibility for fixing this tear is shared between us all, regardless of who caused it.

The tear is called a black hole by common observers. It is the goal of this document to provide the right information in order to track it down, and remedy the hearts of the people on this so that they are not afraid of the future. Allah SWT himself is looking down on the people and wondering if they will be consumed by the growth of the tear, so be mindful!

2. Scientific Data

There is much to assert scientifically that this author does not possess, so relying on statements made by others the section will come together fruitfully.

The tear is effecting a quantum gravity field that is not like others. The field itself does not emit any gravitational effect, so the produced gravitational field is symbolic to the temporal interest at hand, working around and throughout the tear. In short terms, the thought of the universe has been altered in a spot to move more quickly. This is what can be observed visually of the tear in the form of a "rip". Energy was displaced upon the spot and therefore caused the speeding up of time. To be sure, things being pushed into it will be pulled into it by the effect of the increased rate of times elapsing there.

The rate of expansion was posited by one participant as 78 meters per minute, when not being induced by their technology, and 38 meters per minute by another. In time, it will expand to effect Earth in such a way that we cannot survive here. In terms of thought production, the movement of atoms is increasing rapidly by the moment, eventually spiralling into a calamity with no name in English. The stream of knowledge that passes through that space as well is affected, some of it reaching Earth. For certain those affected see a truth not known to them before in various moments, though they would never catch on that it is a new phenomenon in them.

To close the section, light will not pass through the field, do know that.

3. Control Mechanisms

For the most part, data about the black hole is not used for the purposes of control, though that control does exist through the implementation of the knowledge. There are, however, some people asserting dominance over the phenomenon, in various ways.

The Great White Brotherhood is busy transferring the knowledge of the tear to their followers, new and old, and telling them they can control the effects stemming from it. For one participant, they performed a ceremony in which a Rose was created, allegedly from the knowledge being produced by the tear. They have always had this capability, and the transition of knowledge into matter is what it is not. The process is called electrostatic precipitation. You can call it converting thought into matter, though the thought comes from the surrounding environment, not from a primal source of knowledge.

In other ways, they blame others for the creation of the tear. According to one participant in an earlier document writing, in their own words:

"In time, life will begin to unfold rapidly as time progresses into the face of certain truths, like the time vortex in space ripping open more widely. There will be payback for this travesty, we can deliver it prospectively to the people who ascertain this technology."

Left to wonder is if they know who done it.

Another person was alleged to be in control of that knowledge over others. A man named Ivan Watson was identified by one of the participants as being involved in Syria in a plot to coerce citizens into believing the temporal rift was Allah's act, and they should be punished for rebellion. Little more is known about the scenario.

Those known as the Arcturian Special Forces are also at work, as alleged by some participants. They post information regarding the temporal rift, but blame it on the work of the Arcturians, and the same applies for the effects generated from it. They perform control routines much like the Great White Brotherhood but clearly with less of a satanic impact.

And so the rest we leave to effectual control. Once knowledge of the black hole being a tear in space is revealed, more control will emerge in willing fashion over it, no doubt.

4. Threats Emergent

Aside from the current threat of this tear expanding to a size that is debilitating to life, there is also the new emergent thoughts coming forth in the affected people. In short, Allah SWT will have to determine how the shape of his flow of time will take place. Man has certainly been given freedom to rip the universe open, and it's on the highest to compensate. He surely knows what to do in this regard, so do not worry. Your mind will be safe and sound, relatively speaking.

There is one other crucial factor, and that is those using this knowledge to conspire against the guilty. One such person, a Mark Lawrence, was spotted in Satari, Qatar, receiving stolen data from the guilty party's servers on the subject of this tear. He intends to reveal the party, something we will not do here. In the way he will do it, it will cause much damage, and he is in league with the Ivan Watson mentioned before. Know full well that problems lie ahead for those involved.

5. Conclusion

We truly hope that success comes to those seeking remedy for the temporal rift. There is hope, as when their machines turn on and affect the rift, it stops expanding. This drives hope in the field, and we share that enthusiasm. Notably, some who watch want it known that they were helping here, but know attribution is not for this document, only that we say “participants” here. If the time calls for a moment, it calls for it.

I conclude with a list of participants, surely we can acknowledge them:

Central Intelligence Agency
Royal Canadian Mounted Police
Canadian Security Intelligence Service
Ministry of Defence (Canada)
Department of Defense (USA)
China
Mi6
Russia
Anonymous
Angels
Djinn
