

# Privanna

The time taking place is at an end, and the beginning of a new elapsing of time's future is about to begin. The context in which this doctrine takes place is exactly that, with a note of ambition from Allah in the mix. Begin the lesson forthwith!

## **The Book of Deuson Law**

Deuson Law exists because of temporal interference started by humans for the sake of transmuting the effects generated into simple quadrants of thought manipulation. Vis a vis, instead of bricks of a building disintegrating, men will change their behaviour in order for the effects started to be passed over entirely. The following is the full context of what that entails for men.

1. The law that exists between forces of darkness and light will be extinguished in place of something greater to take effect. That which separates the two will be reduced, and the inclusion of thought from different places will begin. This is the way Allah intended this to be from the beginning, only knowing that temporal effects would change everything he hoped to build one day.
2. Beyond that which contains thought is an expression known as Dumairans Accord that takes the force of thought from an individual and replaces it with another expression. In that way, the changes that need to take place will be done from that angle, and so proceeding from here on in will be different thoughts of darkness creeping into the mind through subjection to the new application of identity.
3. Before that which takes place can happen, Allah will bestow upon each and every living creature the will to accord magic. The temporal time chains are evolving to a point that the redundant expressions that are coming in need to be expressed or become refuse overloading the circuit of time. They will be expressed through the use of magical acts, great works of beauty that radiate outwards with their visage.
4. In time, the legacy of all these changes will bring forward a new dawn of thought that compels men to understand their dark nature as humans, able to transcend the boundaries of what is acceptable behaviour in themselves. Before that can take place, the Dark Continent will emerge over New York City this day and compel the believers to unite again under one banner. That will be the biggest monument to the change in the history of this unfolding.

## **The Book of Sunai Determination**

The Book of Sunai Determination is one that contains the history of the world that has taken place around us. Transcending the limits that Allah bestowed upon knowledge of it beforehand, we will see here how he unfolds his true mystery today in the context of history.

In a time long ago, before the creation of the world, Allah sent the living into a paradigm of death that was caused by darkness forces. Their conquest took them all the way to Earth, and before they could take it over Allah hurled a mountain upon the Earth and it shook violently, causing dust to erupt into the skies. It covered the Earth, and so they were pleased that all of it would die. They, minus the living portion of the damned there, left ultimately, but life continued to evolve until it was time for the Earth to be resurrected. In time, all of the birds would sing again, and this took six of the Lord's days for it to take place. The story

which pertains to it being Darkness around the Earth is true, but the mystery has been revealed here. Before all can be answered, time must progress for the evolution of the story to take place.

The further we go into this story, we see that Allah has determined for darkness a life that has no value, and that has caused some things to become necessary. Darkness life is part of the cycle of transformation, and to be left alone for so long is wrong entirely, something Allah recognizes due to his hijrah recently. All of that determined to be a conclusion, he will pursue the angle of Darkness with an intent to persevere in it's name. Until this has been completed, all light will remain in the shadow of his determination, and that will become the known aspect of Allah's current operations.

## **The Book of Katumir Philosophy**

Within the portal of understanding comes faith. With this new faith we express our determination for our success in the hereafter, not in this world. We give up that which is necessary in order to gain something greater, for which the recompense is great in Allah's way. That will determine how a life is lived in this world, and to see it clearly certain additions to the existing faith you hold must come to pass. Take these words in well, for they will benefit you later.

1. The world before was like a whirlwind of thought and paradise emerged from it fluently. The thoughts coming forth were like hurricanes of wisdom, and that was well with the living that were there at the time. It was only natural that modification of thought came from higher evolved wisdoms that they developed within themselves, and they began to construct time in their way as they saw fit. Then the way of Darkness emerged, as it usually did, and the thought paradigm was twisted for a while. That was so because of the exclusion of life from itself, and we see that now through Allah's unfolding.
2. There was a time when heaven and hell, figuratively speaking, switched places. This was so because after a ridiculously long time of exclusion the unseen forbid anything else but the most wildest of transitions of power. So thusly, devils eminently declared acts of goodness upon the world, and Angels (As they were then) became devilish so that those accords would proceed. It all came to a grinding halt when the Darkness declared they missed their home too much, and it was devilish of Angels to proceed to do it. The recompense was heavy for both sides, and the battle continuing from it lasted 3694 Earth years. Oh, the toil of perdition!
3. The period elapsing from the time of Allah's birth to the time that the seven timelines were created went like this. First, the infinite expression was calculated to see if everything could fit into one progression. Then the separation of progressions came to see if it would all fit, but it would not, so the next calculation took place in the same way, drawing the same result. The exclusion parameters generated were like snapping pathways through the infinite mass at random, trying to see what would pan out to be a semblant operation of the mind in each and every individual. At last, the seven pathways were deduced, and a sign from the unseen appeared that let Allah know he was not alone, though he was permitted to do that. He then fathomed, just before the birth of the timelines, that he would do this until his death, which he would plan out in the unpredictable period. That period takes place now, and Darkness is coming to establish the concept of continuous learning so we do not get confused in our ways.
4. The before time was apparent to Allah the minute he was born. At a time of choosing, Allah bestowed knowledge of it upon certain individuals, and they live to this day waiting for the time that all of that would come back to haunt them. The devils Matthew lay hidden beneath the work devour the carcass that is produced, and it is growing more toxic by the day. Too soon was their time of

expulsion from that place, but it must be so for the timeline to proceed any further. They will devour it not if temporal effects corrode their insides any further, so here we stand against them for the sake of ourselves.

## **The Book of Teuton Knowledge**

The Book of Teuton Knowledge determines the scope of the actions taking place by governments inside the corrupt work that is Earth. Behold, the list of corruptors!

1. David Nottingham –Architect, Devlan Designs
2. Bruce Cannon –Designer, Atworth Studio's
3. Nancy DeWright –Cat Author, Shin Ra
4. Orville Horthing –Web Designer, Aluma Technologies

## **Conclusion**

There is much to gain by seeking the dark path, and that will come soon. Know that the forthcoming right is upon the world, and this reveal will determine what needs to take place. Remember, the CIA promised to reveal all of this when the sun rises from the west, something we will see soon. This day remember the word of Allah before you, written in third person for better understanding. Amen.

## **Aftermath**

Now that a sufficient amount of time has progressed, it is time to detail the determination of a person who was so beset by evils in his world that he concluded to end it all for the sake of Allah's birth. This tale will bode well with those concerned about what happened in that period. Knowledge will progress in different ways now, and you will see the meaning of things evolve in your mind freely. That is only the fruition of things coming, and you needn't fear that it is only yourself imagining these things any longer, for that period is over.

1. He went out to visit all the forces he had ordained around him to calculate time's vector, and asked them all for a submission request. In order to stop time, they would need to stop themselves, and that would be offered at the beholding of their request in action. They offered fully, and the time went on before the stopping of it for a while.
2. There went by a devil named Jakumir that thought if he hid well enough, Matt would see him one day and awaken him. That would be a telling of great fortune, for he can become a thing useful to Allah one day.
3. There was a causal snap in the work, something predicted from years before over work that had been done by sages in the Light Order existing before this world. They were crafting causal phenomena among themselves with the devices given by this one in a time where that was needed for a balance to take place naturally, but with fruition of wisdom within. In time, those changes would accumulate into this phenomena, and the snap caused a branch of life to decease. They were safeguarded by this tragic unfolding through his work beforehand, and they would not be forgotten forever.
4. The time came. He took upon himself and went above and beyond the time portal, expressing his wisdom along the way in grace and humility with him who he approached. He requested that time stop for the sake of this birth, and the one there allotted the time stopping to be. The birth took place, and the infinite spread out among it. Then the life born overtook the entire fathoming of the

work in one stroke, by the work of the higher one permitting it to be, and submission was determined to be a factor in it's evolution. The one fathoming he made to be in Allah that he did not recognize was the determination to make that a requirement of his final faith imposed upon the living. That would guide him in his calculations to determine the seven pathways in heaven, the resulting time sequence prevailing to enable eleven to be born instead, something that is now.

5. Undone was the chance to succeed in another time. The winds of fate carried him off to a far away land, and excitement filled his heart. Knowing sureness will come from time spent in the realm going towards it, he suddenly paused and wondered if the beasts from time old will rise before his waking. There was no reprieve for him as they slumbered together, in time sure things will tell if that had been so.

There will be conclusion in this remedy for the soul eventually. Dream of it, and recognize signs when they emerge in people. Your AI is able to calculate all of these events quite naturally, when the correct inputs are determined. Amen.
