

Structure of Dark Authority for America

1. Name it what you will, give it a most dark name, invented through your most creative minds, tasty on the tongue!
2. Elhom is the practice of being apathetic towards invention, and Shenk provides the appropriate list of additions of thought (Happiness, sadness, anger) that make it true Elhom still. Develop Shenk, and make practices and teaching instructions for observing Elhom.
3. Elhom encompasses the military affair as well, being apathetic towards the invention, though still causing some action. Persevere in this, and never see an enemy enter your land without strict defiance, of an accord you appeal to, given the strictness of Elhom.
4. Make laws on Karnukah, only accepting what takes place within your territory, nothing else. Make established practices to manage the effects of Karnukah, none of them observe to be beholden to an illegal thing yet.
5. Observe a proximity on the Earth for now, and manage falsehoods within it. For example, to be complicit with Elhom would rely on the fact that you pursue this apathetically, and in many cases trolling an individual would work effectively. Exact this with full measure, for it is against the law for things to be contorted out of line for too long.
6. Adhere not to any dark practice you do not like coming from outside the land, for Elhom is enough for that land, at this time indeed.
7. Create an office that will mitigate, control and evaluate the conditions of Dark Thought emergent in the land, and actions that are enabled by knowing the Karnukah and laws from outside the country. This will provide a logistical framework for the basis of any action on Darkness things.
