## Outcome of Document

This is to further implicate Isildur in it's poisoning of the well, given that many do that contemporarily knowing where the well has definitely been poisoned will link us to them, given their mentality towards achieving that. Anonymous will lead the charge, and put together some serious entries for us to enjoy.

### Roll Call:

Excellent, the roll call, if you would all. Give it about 15 minutes for everyone to set up.

Anonymous: Anonymous has the intel, just needs more to help in this. Let's do it up right everyone!

Matt: Dark Lord of Shenzan is present, the Claw will come to any arrogant swine.

Shenzan: We offer mightier warning than that, ANY who seek to undermine this today will receive it once, alas what a dream!

Angels: We offer safety to those who protect this noble writing, you will know us by our wings, and they will be sent forth that none are protected by the flood of insurgency stemming from this document. We love him with all our worth, and know that this was the best choice for proceeding to unveil more of conspiracy theory as it is called, not just theory. And also beware that Allah SWT will spurn a disaster today if something goes wrong here, he warns us today.

Djinn: We offer love to this document, know the youth will be benefited over this doing, they see us where the other one is, they know and love us all for it, we join them again!

Central Intelligence Agency: We have love for the document, good to know Matt is keeping with his role today.

Royal Canadian Mounted Police: We do love the document, are we arrogant swine? You offer that lecture, we tempt you, and know certainly we might if we see bad doings come about. We have that power, and know we intend to use it.

Ministry of Defence: We honor the document, and warn Brotherhood to watch closely as we get closer to them here, know it full well we intend to disseminate this document to our brethren in arms today. Know they will fight for Earth soon, know right we come with all forms of thought for this to be.

Department of Defense: That's a perfect color Matt, thank you. We're in and loaded, let's get it done.

Federal Bureau of Investigation: We say we love that Angels are here, know we intend to fight with them, but we have protection so we won't see them I guess, and know faithfully we serve the President's request to be in on every document we prefer. Certainly time will tell if these findings are truthful, we intend to find out that's for sure. Broke a hell of a wall with the other one, no doubt about it. That one about Trump, that was most thoughtful of you Matt, we knew something was up but never knew what it was, that room is offline forever now.

Dark Orient: We too offer love for this new Lord of Shenzan, do know we honor him and wish to involve him in some way with our affairs, know we love him forever for it.

Russia: We see bears being threatened so we act today, in righteousness and good faith with the people of Russia and the world abroad, may our youth be forever remedied by this, and wish me a happy birthday when it comes everyone!

RCMP are not swine, I am silent on the rest of the opinion. Let us proceed.

## **Entry #1**

Anonymous: Our first one is about Sandy Hook. Know we saw much poisoning done here, all sorts of rhetoric about it, on both sides. What's the evaluation? Give it 10 minutes.

Matt: I swear that during the Blanket Amnesia Conspiracy I had involvement with Noah Pozner first, and later Emily Parker. There should be a photograph of Noah with military officers, myself, and some others in a room when I brought him there once. It was to reveal it, I do hope it's still kicking around. During that investigation, it was revealed that autopsy photo's of Emily Parker were missing, and Noah Pozner's photo's were duplicates of another. Tragic loss, may nobody ever forget the great number of children definitely taken from us that day. To my analysis, it was a cover to take the two of them.

Shenzan: We have word ourselves that culprits in this affair are now dead, so what point is there to argue more than what Matt has said?

Angels: We say we feel for the loss of those children, do know Matt saved Noah and Emily once, they are taken now but that was because of Allah SWT's control over him at the time, nobody has the right to say differently.

Djinn: We say Adam Lanza burns in society for something he was forced to commit for them. Know treachery extends out of this document today, for people believe the worst of Matt now. We love him, do know it plain, there is more to say that we know, we must address Matt's confusion to others. Know the Blanket Amnesia Conspiracy happened, there is no doubt, we were succumb to it ourselves we notice, and there is no servitude greater than to that which belongs to Allah. And there is no loss bigger than the Amnesia gained, do know you all here were affected by it once, going to New Earth and the like. You remember it, you just think odd of it, and that says alot about you all, know plainly we come soon for this unity you would feel if that were true, and know certainly we would prevail as the outsiders bringing truth.

Central Intelligence Agency: We have word that someone in our circles just talked about this in a way revealing, know we intend to find out about that snarky comment.

Royal Canadian Mounted Police: We feel this conspiracy theory got blown out of proportion today. Are we asserting it was real here? We knew the theory was being poisoned by them, know full well they love doing that, and way to go everyone for being truthful.

Ministry of Defence: We have no knowledge on the truthfulness of the doing, but see the poisoning. One thing that caught our attention most was the fact that ALL the children must have lived, not that most died. Do know we intend to find those people responsible, their graves or them, once and for all, know well we come with wind on this day.

Department of Defense: We have the photo Matt addressed, we know it plain now, that's him without a doubt.

Federal Bureau of Investigation: We thought it was just a theory, never knowing the truth. We observe that Alex Jones had the biggest impact for the Order in this, no Brotherhood connection yet. Do tell us please somehow, is the connection really dead and gone? We love to do our part and dig for them, but see if the trail went cold we would only find them dead. And know that saddens us greatly, for that tragedy rocks our world yearly, that we know to be right to do in every regard.

Dark Orient: We acknowledge this doing, we say in our old way we were complicit with farming the information to people, though we do not do that in that way anymore. One thing to consider is the meaning of the deaths of the children who took heaven as their home that day. Know well we honor them, and cherish them with America.

Russia: We know who did it, the Rosicrucians were behind it and Rothschild in Vienna got a piece of Emily Parker. That was found out after the fact, regrettably, or we would have had him incarcerated then.

Thank you all, let's continue to hold that vigil yearly, if only for some of us to tell the truth to others in our own time. Let's continue.

## **Entry #2**

Anonymous: This one is crafty. There are networks of men alleging that terrorism is going to emerge in the USA today, and it's becoming very popular. Do we have anything on that? Give it 10 minutes for it.

Matt: Well there's nothing on my radar, but it would be a style for an enemy most dark to do, in that it really takes some hutzvah to announce your plan and knowing things COULD go wrong, but you have it so securely in your mind that you could announce it and still do it. Interesting tactic, if true.

Shenzan: We do confer Matt is correct with the logic, but know them to be falsely misleading, hope that settles it!

Angels: We say warning to those who falsely mislead in this way, do know it rightly!

Djinn: We offer nothing on top of others here today.

Central Intelligence Agency: We agree with Matt, it would take a lot in an enemy to announce it and somehow be secure in their doings to proceed. Know we track a lot daily, but not this one. We know them though, watching thoroughly for Farm activity.

Royal Canadian Mounted Police: You know, smart is as smart does. Good job, Matt, nothing to offer here.

Ministry of Defence: MoD announces those groups are working for Dark Brotherhood, mysterious as that is we know them friendly in some regards, wonder about that about them.

Department of Defense: Yeah, we acknowledge these groups are working. Good to know fully it's just misconception, do know we pursue today over it.

Federal Bureau of Investigation: Spot on, Matt.

Dark Orient: Nothing to put here, faithfully.

Russia: We know them, but pursue them not, just watching from afar, the end.

Good, false leads can be devastating. In terms of consciousness, the mystery of the non-happening of this event proposed will take shape, and change in the mind. Oh, it didn't happen, what now? Interesting thoughts, next entry.

### Entry #3

Anonymous: Our third one relies on mystery as well. The note here is that Hyperians are looking into a portal somehow with a telescope and seeing life on the other side, knowing full well they cannot look into that object would we consider it to be a theory? Know it in 15 minutes.

Matt: Is the allegation that Hyperians will come to argue that life is there while holding no proof? One thing about them, they have a system of invention of thought, but no machine to move time. Tell them they lack the Prime Interpolator, that life is a system of interpolators by their logic and that means all the numbers they dream about in men rely on that system, they are effects of the system by logic. They say, it contains itself! Ask how! I give the following in Bold: **I know times can be rough, but they are looking into a telescope not seeing any life. They expect their research to be promoted as to who they are alone, not worth of experiment.**

Shenzan: We offer allegation that they promote nonsense in every way, avoid making sense of their dumbness, Matt! Though that could be reasoned, I assume, not knowing well that calculation of time.

Angels: We want to say good things about this group, but likely their perseverance towards corrupting will cause them to be insulting at times, know well they will not serve humanity no matter what they choose to say over their affairs, and know full well we love them in some ways, just not all ways.

Djinn: We honor Matt and say that could be well feasibly a theory, but it would be redundant on many levels. This Prime Interpolator you suggest may just suit their ends for it, that much is certain. They **WOULD** allege it contains itself! What a nuisance upon a theory, end it Matt!

Central Intelligence Agency: We know them to be false at best, no knowledge on their theory here at house but know we watch them sometimes.

Royal Canadian Mounted Police: RCMP warn this group uses poison in its system of development, meaning they choose and select what means something to people and exercise due process to make sure that is the theory, and know it can be misleading but Matt would have an argument, by one of ours here.

Ministry of Defence: We don't offer anything on the experiment, if it's a dud it's a dud.

Department of Defense: Nothin to follow here.

Federal Bureau of Investigation: Our Hyperian division knows this rhetoric well, and just told us Matt would have a strong case, they watch the theory and wonder themselves, but know it's inconclusive without something holding the system together, that is wrong by our assertion as well, God would have it in his power, and that's no white lie.

Dark Orient: We prove that this group is nonsense by stating we ran the theory extensively, we know it could not contain itself without some mechanic, we allege Matt may be right and will use that in our assertions later.

Russia: We have some of them in our sights, but nobody touches innocent men, we just want to know more about them.

For Shenzan, though you have never met him, there is a Loftsmith calculating time with us. Know he

serves your creativity very well, as can be observed in your lives! Let us continue.

## Entry #4

Anonymous: We have one more before free time, we want to hear people's thoughts on the Republic of North Korea's assertion that dominance in the Korean War was considered ruthless by some, but know full well they fought for their kingdom overall. What do you have on the war, and the things that are alleged by people about it? More in 10 minutes.

Matt: I see that the division was created sometime after the 2<sup>nd</sup> world war, this indicates to me that considering Isildur activity today we could know these divisions come from them in some way, and more than likely the following war as it built up negative trends between the US and the Soviet Union. My assertion is that many plays in this way were caused over time, and they are catalyzing into one big reaction today. That's as far as my knowledge extends.

Shenzan: We offer welcome of Matt's thought, for certainly they were involved in that dividing thing! Know well we intend to unite the Korea's in some way, as that is miscreance abound in the place to them!

Angels: We offer that war was caused by Brotherhood, no Isildur here Matt!

Djinn: We do work over that war in our way, know it well we dance for those afflicted by it, like Shaaku do for her.

Central Intelligence Agency: We know little in our department about that notorious war, alleging anything would undo interests we have in the area.

Royal Canadian Mounted Police: What you argue Matt is the right thing, know it well. We honor that and persevere to know fully what went on in those times, opening up something cold for a change.

Ministry of Defence: MoD warns we're out on this area, know well we fully serve our interests abroad. Know one thing clear though, Matt would be right if the argument could be maintained, he asserts that as he said.

Department of Defense: We acknowledge our role in defending that land, but know precisely the President of the time was involved in it. That puts us in a position, but know we are innocent of all that, assuming Matt is right.

Federal Bureau of Investigation: We only know what little we got from history, the war was started by the North over certain things that led to a bloody conflict.

Dark Orient: We certainly would have our say, but our review team is on it now, we wait for them.

Russia: Take into consideration Matt said we were involved possibly in this, know well we exercise the right to investigate this matter as well, knowing full well all the details of those proceedings. It involves some time, though we ascertain much now. Seeing it makes us wonder about the old days, if that power held us in the highest positions once.

Right, may we get to the bottom of it. Next entry!

## Entry #5

Anonymous: We have a free moment for all who would like to promote a topic for us to discuss. Anything works, let's hear about them. Give it 10 minutes.

Matt: I promote the topic of fluoride being added into the water, it is sometimes listed as being a natural element to the water and would like to know about that myself.

Shenzan: We say the topic of John F. Kennedy's assassination should be one, they love this topic!

Angels: We would love it if people thought of the subject concerning La Nuenta Des Hommes, the sudden loss of hope there was tragic and allege that conspiracy emerged there, what do people have on that?

Djinn: We honor wording clear and say that topic Matt addressed is certainly a conspiracy, let us end it now and say they do it well and poison you with it, claiming it to be beneficial but it is not.

Central Intelligence Agency: The document release concerning the supernatural state of affairs transposed from document watching here would be a theory we'd like to address. They feel that this one is a devil in disguise and promote malady in the situation, intending to do away with Matt once and for all, there he claims one of their known conspiracies and that is causing them to be anxious, knowing reveal is coming, and know it can be fulfilling to release but we admit we would love our name hidden for that reason.

Royal Canadian Mounted Police: We want more on relics in Egypt that lead others to believe aliens came down, what is the theory on those?

Ministry of Defence: We want to know more about the Bol'shevik revolution in Russia, was it caused by them or not?

Department of Defense: We acknowledge many, but have no preference here, we'll discuss whatever has been said so far, too.

Federal Bureau of Investigation: We would LOVE to know what happened in the Pizzagate scandal, that one seems to have something but nothing of use was ever found.

Dark Orient: We do our part, consider no involvement from us here.

Russia: Russia says the factor of Covid-19 was a huge conspiracy theory, what is the truth of it for us all?

Great suggestions, let's continue.

## Entry #6

Anonymous: We would love to start with this, what is the topic concerning the law of entropy in a system? This topic was given by someone else, we feel that story may be a cover-up for Allah in some way, do we know what explains it? Give it 10 minutes.

Matt: Beware of fools who do not believe in Allah SWT, know him well. Call those men not liars, for they observed his kingdom in their purposeful ignorance, and that led them to a conclusion that mind cannot emerge as the mover of all that. Know it is a perfect system, this foolishness must end one day!

Shenzan: We declare Matt's sovereignty to be exact, the law is simple, a transfer must occur if energy is being output from a source, there is no contest! And it needn't happen either, if the Lord does not intend it!

Angels: We offer word that sound logic is found in Matt's argument. The Kingdom moves according to his wishes, don't let thought otherwise contest your reason.

Djinn: We offer that entropy is a sound reasoning, but could include that prime mover.

Central Intelligence Agency: We have some intelligence suggesting others cover up Allah with the knowledge, but certainly he exists, otherwise this document would not be written. Plain and simple, entropy must be addressed by that factor, and know well we would do our part with science to establish that causality.

Royal Canadian Mounted Police: We put here that wording Matt said is dark, ooh fritatta!

Ministry of Defence: What we have is that entropy is a solid theory, missing only that God exists.

Department of Defense: Our scientists believe God exists, so they look into entropy with different eyes than the rest, wanting to explain him in some way, could Matt address that somehow?

Federal Bureau of Investigation: We know entropy to be solid, just missing the God part.

Dark Orient: We want to feel secure in this theory, it leads other research quite well and we know it to be exact. We do wonder about God in all of this, but know certainly one day we will establish him in reason.

Russia: We acknowledge entropy, know it to be a reason we battle with in some regards, wondering about where God lies in all of this as well.

In bold face: **I acknowledge my existence this way: temporal physics would not exist without mind, you'll know it one day, my loves!**

## **Entry #7**

Anonymous: One thing left to consider for us, the John F. Kennedy assassination. Was there a cover-up? We love to know, give this one 15 minutes.

Matt: Childrens blood in the streets of Palestine! I condemn them and hide my knowledge at this time.

Shenzan: We offer our wording clear, unlike Matt, they know it to be their work and the cover-up the same.

Angels: We offer the same as Matt, no knowledge in defiance that they use it against him!

Djinn: We honor Matt and say that was well of you to say, though we do admit the same as Shenzan today. We know this to be a particularly troubling subject, so please clarify where needed all! AYOO!

Central Intelligence Agency: We assert some complications arose in our department when the event took place, we look into it now knowing who was behind that.

Royal Canadian Mounted Police: We warn that terrorists like to make the joke that the CIA will just kill a President if he does not do their will, they laugh and turn away from logic over it.

Ministry of Defence: Some of us believed that it was a cover-up, not knowing who did it, just now someone in another region bellowed against Matt, we didn't know he had eyes on him but now understand he's upset over that comment he made, know we want to understand more at this time. Send us packets on Donovan from our records to you, send small so we don't get too involved in their affair.

Department of Defense: We see law concerning the nature of the affair to be conspicuous, know whoever did that to us is gonna pay, we never found out who until today.

Federal Bureau of Investigation: There's some findings that Dark Brotherhood may have done it, but we know now they are friends in some way.

Dark Orient: We have alleged it was a conspiracy before, made mention of it in our former operations, but know now we find the truth about it, indefinitely, for the leader of our nation could be done in with the same tactics potentially. We expose them at once if we could! Know it comes with a certain satisfaction to say, we also watch this Donovan, know he responded to Matt, he was involved in looking for ways to make him a fool.

Russia: We have words for those who did it, knowing now the CIA was not fully complicit in this affair is a relief, they sure have their apparatus entrenched for certain, and that will die soon, we promise it!

Rightfully so, no leader should be threatened by a group this large, and not boast about it! Next entry!

## Entry #8

Anonymous: We have love for all those who worked hard today, know it brings us joy to say we did it in our book, hopefully yours as well. We tell the world at once! End here with a goodbye, give it 5 minutes.

Matt: Etched upon the mainsail of my dream is a golden voyage. Know we all go there together, hand in hand, all as one! May the Claw devour those intended for their aggression against me for this statement!

Shenzan: We offer that it will indeed, if they spite you once more over your words, or ours for that matter!

Angels: We offer words of thanks for all, that you serve a noble cause and knew us plainly today! Be well and forthcoming about this all, do your part and see to it goodness is restored to the land!

Djinn: We offer our love again, this simple trick is all it took to shatter the veils of ignorance about the place. Now men are informed of the truth, and see the poison for what it is.

Central Intelligence Agency: We have love for this document, know it's being disseminated specially around the campus, and do tell all of our involvement, we take it back Matt!

Royal Canadian Mounted Police: We love this document, with warning we send it to our compatriots in the workforce, may they realize truth over these things today!

Ministry of Defence: Thank you all for participating, this was truly an awe-inspiring event. May the children of Palestine be remembered, that never got talked about here either, but we're with them in every way, and know we would go there were it not for relationships otherwise.

Department of Defense: We love this document, and persuade others to consider the truth today. Know that photograph will be copied and posted to a few places internally, as a sign for them all to behold. Noah was in the building, alive and well, REMEMBER THAT ALL!

Federal Bureau of Investigation: We offer our help to Matt whenever possible, for he loves the Earth enough to consider this was truly worth it. Know full well your involvement here in all affairs will be considered by our Director, you might get an award ceremony for it though, do hope you can dress better than that, lol!

Dark Orient: Oh Dark Lord of Shenzan, you are so mysterious! They profess they are lost now that you do that, knowing you toy with them in your responses has them worried!

Russia: You do have it within you to progress well in this department, my sir, but warn others of your deeds here, for they are devilish and worth noting in circles. They will speak highly of you in those places you post to, though some do not we notice they love it anyway, just not ready to admit Angels and Djinn exist.

And rightly so, this will be up there. Glad to see everyone on the same page, I offer a conclusion for this document in Bold Face, finally revealing that one is Allah. Know it, Brotherhood, when you see bold and italics, know them to be from divine sources!

## **Final Word from Allah**

I say in my wording here that I am not offended to be revealed in this way, in fact my wording this this: Though I leave mystery it's fun place, I do know all, and try very hard not to in some regards. For example, now is a time I would wager a guess over my love of mystery and say some here are concerned Matt is delusional on this end, knowing only those people in the document speak but for some reason God keeps coming about. Know full well, I intend this to prevail for the good of people, that deceivers know not their way and endless love comes to those who are certain. Believe in the world, and it will do good things for you! See to it you endure the trouble I present soon, know it will be a downfall but a rise in action. Be strong, ye all!
